

LAKE AND CANAL LIVES
Canal Point, July 3, 8 a. m.
Lake and Canal both at 14.9 feet.

VOL. 8—NO. 17.

The Glades And Its Affairs

By Howard Sharp.

A defendant has been arraigned on a charge of "violating the jurisdiction" required that ventriloquism be asked. "Have you any prejudice for or against the defendant?"

The ventriloquist answered, "I've got a prejudice against all horse thieves."

I have no prejudice against the establishing of a stable of the property, credit and reputation I've got in the Everglades and I hope I'll never be fool enough to cut off my nose to spite my face.

The defendant answered, "I've got a prejudice against all horse thieves." I have no prejudice against the establishing of a stable of the property, credit and reputation I've got in the Everglades and I hope I'll never be fool enough to cut off my nose to spite my face.

It is deliberated opinion that the Dahlberg sugar company prosecution has done the Lake Okechobee region more harm than good, and that instead of a projected reorganization of that undertaking being a good thing for the country it may be a bad thing.

For 20 years the wealthiest men in the United States have lived in their winter homes at Palm Beach, practically on the edge of the Everglades; these men whose sound judgment and energy made them possessors of great fortunes know a deal about the Everglades.

Employees of the sugar company in the Canal Point division have said that \$500,000 profit was made on the 1932-33 season, while the company was making a loss of \$100,000.

The use of the name and credit of General Motors by the volunteer spokesmen for Dahlberg's crowd ought to draw a reprimand from the responsible heads of that great organization. If it is true—and we don't believe it—that "General Motors" is behind the sugar company, or that "General Motors" wants to get control of the sugar company, it will immediately stop.

Just as many contracts will be given in the Lake Okechobee region as just as many men hired if the sugar business is carried on a company that B. G. Dahlberg and his original associates do not have anything to do with.

Keep Cool and Enjoy Life This Summer!

DEBTS PAID BY SUGAR CO. IN SUGAR CO. IN

Trust Fund Is Drawn Upon
On Plea of Needs of
Maintenance

NO MONEY PUT UP
BY REORGANIZERS

Special Master Hints Re-
ceivership May Go On
For Another Year

Receivership of the insolvent Southern Sugar Company was not terminated on July 1 by Judge George W. Whitehurst as he had said he would, and taxes have not been paid as was promised. Instead of the 1930-31 operations being paid for by the company, the statement of John L. Doggett, take up the floating indebtedness, the advances of money on receipts of the company have not been repaid, and the company is still in operating expenses for next season.

The purported reorganization, announced with a blast of trumpets and as to be accomplished July 1, was a mere sham. It was not a reorganization of the company, but a reorganization of the company's assets.

What the expenses and receipts of the company have been for the last season has not been put on record, but Judge Whitehurst has exacted a promise from the receivers that the company will come into its court on July 15 with a statement of its assets and liabilities.

Employees of the sugar company in the Canal Point division have said that \$500,000 profit was made on the 1932-33 season, while the company was making a loss of \$100,000.

The use of the name and credit of General Motors by the volunteer spokesmen for Dahlberg's crowd ought to draw a reprimand from the responsible heads of that great organization. If it is true—and we don't believe it—that "General Motors" is behind the sugar company, or that "General Motors" wants to get control of the sugar company, it will immediately stop.

Just as many contracts will be given in the Lake Okechobee region as just as many men hired if the sugar business is carried on a company that B. G. Dahlberg and his original associates do not have anything to do with.

BEST JUNE BUSINESS COUNTRY EVER HAD

Business is good in the Lake Okechobee region. Retailers and business men in all sales say trade is solid and well as to be surprising.

C. V. Denton, hardware man at Pahokee, who established a retail store at South Bay 12 years ago, says his business in June was the best he ever had.

B. Elliott, Ford representative says never before did he sell a car in June; this June he sold 14, and his collections are fine.

CAUTIONS ABOUT SEED

Dr. R. V. Allison of Everglades Experiment Station, cautions growers that use of home-grown seed may spread diseases. Most of the failure of crops in this region was caused by bad seed, whether home-grown or imported, and if there was disease in the fields from which the home-grown bean seed was taken, disease was likely to be communicated to the next crop.

RECEIVERSHIP LAWYER TO FIGHT SUGAR CO. SUITS

The law firm of Carter & Yonge at Pensacola has been retained by Everglades drainage district to represent the district in the suit against the sugar company. The suit was not out of proportion to the value of the property involved.

The committee of bondholders who have brought suits are H. C. Rorick, Walter Lippincott and James R. Eastman. The first suit was filed at Pensacola May 16 and a second suit was filed a few days later. Both suits were filed in the federal court at Pensacola.

THE SUGAR COMPANY IS HARD UP
BLAME SUGAR CO.

Had financial condition of some of the bondholders been known, the suit would have been a lot different. The fact that the sugar company is hard up is a fact that is not being mentioned.

The Southern Sugar Company is represented as having the support of General Motors, the president of the Central Farmers Trust Company of West Palm Beach and a long list of capitalists and industrialists.

TWO NEW HOUSES AT WELLS' BEAN CITY

Building operations at Began Point have been made and the new buildings and continuing calculation of the immense acreage of cane.

NEXT SEASON IS LIKELY TO BE BEST EVER HAD

All Conditions Favorable
To Large Acreage, Big
Yield, Good Price

PRODUCTION COSTS
ARE MADE LOWER

Rent-Free, Untaxed Land
To Compete With Land
Held Too High

Ending a truck farming season that was as good as average, the Everglades and Lake Okechobee region have in prospect a season in the coming twelve months that will be the best in the history of the region. This prospect is based on the promise of the district of Lake Okechobee and prevention of its overflow and is supported by other conditions, one of which is the operation of the district that puts a higher duty on vegetables produced in Cuba and Mexico.

The heaviest burden borne by production in this region is the high rent on land, the charge for use of the land not having been reduced in the past season. The expenses of production, transportation and sale. Use of tracts abandoned by residents owners will compete with the land held by owners who have high rent in cash or share of the crop.

The lake level probably will be lower in the next season than in the past and at a 13-foot level, fully 4,000 acres of inland and lake bottom land will be made available for production in addition to the cultivated area on the mainland.

Benefit of wind-breaks in bean fields—planting corn and sunflower—these are the main reasons so fully demonstrated last winter as to make certain that the method will be used next season.

Installation of vats containing clove of ice for the pre-cooling of vegetables, fruit and other foodstuffs will increase the total tonnage of cars shipped from the Lake region.

Increase in production in the Lake region will not be of itself over-production and glutting of the market. The Lake region is only one part of the many sections in which vegetables are grown, and when this is overproduced it is when the conditions in all districts are not in a condition in one district. This being true, and as there is keen competition between districts, the more favorable situation of the Lake region probably will cause other districts to reduce their acreage, leaving this section a fair share of the markets.

REPAIR BANK BUILDING

Picture in the Bank of Canal Point have been made and the new buildings and continuing calculation of the immense acreage of cane.

END OF FARM LOANS SUITS OUR GROWERS

Withdrawal of government loans to truck farmers in the Everglades, reported in The Everglades News last week, was received with far more satisfaction than regret.

The first \$600 cars over last season was that the cessation of loans was the proper course, for although there was reason for such loans immediately following the hurricanes, it was a bad course to make a settled policy.

What Everglades growers want now is that no more such loans be made in territory that competes with this. The government officials cannot expect borrowers to repay the loans if the borrowers have to sell their crops in competition with continued subsidies to other districts.

REVIS PAROLED

Lacey Rowie, who was under penitentiary sentence from the Federal court, is understood to have been released by the warden of the Oklawaha, who has made himself responsible for Rowie's conduct.

MORE LAND FOR USE EXPERIMENT FARM

The 640 acres of section 10, township 44, range 40, section 3, More land has been acquired for an extension of Everglades Experiment Station which is located in section 3. More land has long been needed for the experiment station and the purchase of the land in section 3 was contemplated, but as that would require a bridge across Hillsboro canal, the acquiring of the adjoining land of the Everglades section 2 was contemplated.

The purchase of the land in section 2 was contemplated, but as that would require a bridge across Hillsboro canal, the acquiring of the adjoining land of the Everglades section 2 was contemplated.

A pump that is being installed at the experiment station has such a large capacity that it will be used for the production of a larger variety of vegetables to other localities, due to the ability of buyers to get their mixed crops at other points better than at the Canal Point station, the mixed crop movement has been increased.

SUITS TO SETTLE WHAT LAND WORTH

Three sets of parties seem to be involved in a suit about 20,000 acres of land in the Lake region. The suit is being brought by the Lake region and the Lake region is being sued by the Lake region.

FOR FIRE PROTECTION
Belle Glade town officials and citizens proposed to make a fire near the colored schoolhouse from which water will be pumped into the Lake region. A hole was blasted and a dragline removed the mud, after which the rock was shot and water let in from the lower strata.

VACATION AT PEAK

Most of the residents who are to lake vacations have left and soon they will be returning, some to go away again in September when they have got their farm work laid out.

FIXING ROAD GRADER

A State Road Department crew has been at work on the road from the Canal Point blacksmith shop to the Hillsboro canal. The road is being fixed with a frame for a canopy at the Canal Point blacksmith shop.

LAKE WAS ROUGH

Lake Okechobee was roaring and there were whitecaps on the water 6 o'clock this morning. There must have been a stiff wind on the west side of the lake.

PULLING FOR GEORGIA

Three cars of East Beach people left yesterday for trips into Georgia that was "pulling for Georgia" but most of the "pulling for Georgia" is on account of the Shelling-Stirling fight that takes place tonight at Cleveland, Ohio.

MILKLEN DRUG STORE

Fixtures were received this week for a drug store that A. Milken will have in a room in the Bryant building, the location he had before the fire last December.

CAR MOVEMENT SHOWS CHANGE IN PRODUCTION

Meaning of Figures Discussed at Meeting of Rotary Club

MAY AFFECT SITE
OF F. O. B. MARKET

Aid To Mixed Car System
Through Diversity of
Truck Crops

Notice was taken at the meeting Friday of the Pahokee Rotary Club of the figures of vegetable shipments from this region. The figures showing an increase of 800 cars over last season, President George C. McFarley called attention to the figures and invited discussion of their significance. This led to a general statement of the agricultural situation of the Everglades section of Palm Beach county, in which M. C. Denton, Bert Lapp and Howard Sharp took part.

The figures were generally accepted as indicating that an objective of the region was being attained—diversification and the spread of the agricultural situation of the Everglades section of Palm Beach county, in which M. C. Denton, Bert Lapp and Howard Sharp took part.

A possible shifting of the cash market away from Canal Point, Pahokee was suggested by the fact that production of a larger variety of vegetables to other localities, due to the ability of buyers to get their mixed crops at other points better than at the Canal Point station, the mixed crop movement has been increased.

TRACTOR PULLS MOVER

A State Road Department crew has been at work on the road from the Canal Point blacksmith shop to the Hillsboro canal. The road is being fixed with a frame for a canopy at the Canal Point blacksmith shop.

Fixtures were received this week for a drug store that A. Milken will have in a room in the Bryant building, the location he had before the fire last December.

TARIFF WILL LIMIT PEPPERS IN CUBA

Growers in Cuba have found the tariff too much to overcome and there will be very little competition in peppers from the island next season, Professor H. W. Shumaker, sales manager of the Kila Seed Company, said in Pompano when he passed through there on his way to Plant City from Cuba, where he had been for some time booking orders for next season's seeds.

The Cuban growers would not give orders for peppers but gave orders for tomatoes instead. Professor Shumaker is now in the Bahamas islands taking orders for tomato seed.

2 BALL GAMES HERE ON FOURTH OF JULY

The Matheson News Commission and the East Beach teams of the County Baseball League will play two games at the sugar company's diamond tomorrow, Saturday, July 4th.

The first game will start at 2 o'clock. The admission will be 35 cents for the two games or on account of the occasion.

2 BASE BALL GAMES ON LOCAL DIAMOND

Matheson News Commission and the East Beach teams of the County Baseball League will play two games at the sugar company's diamond tomorrow, Saturday, July 4th.

The first game will start at 2 o'clock. The admission will be 35 cents for the two games or on account of the occasion.

PROGRESS IS MADE PHONE EXCHANGE

Progress of the effort to get the Southern Bell Telephone Company to install a local exchange to serve Pahokee and Canal Point is reported in a letter received by T. L. Jordan, secretary of the telephone company as follows:

"Within the next few days I hope we will have recently made a survey of the area and surrounding territory with the idea in mind of establishing an exchange which will be of benefit to the community."

LAKE NOT AS LOW AS IN OTHER YEARS

A level of 14.9 feet was recorded on Monday for Lake Okechobee at Canal Point and some persons of short residence or short memory got excited about it and expressed their opinion that the lake was going to dry up.

It isn't the first time Lake Okechobee has been below the 15-foot elevation around about the level of the lake hasn't anything to do with much fires or frosts.

GLADES BIG FARM WINS ADMIRATION

Visit to Shawano, seat of Brown County farming operations on Hillsboro canal, was made last week by the editor of the Arcadia weekly newspaper, who wrote an article extolling the property and its operation. The trip was made with W. A. Neal of Arcadia, who got several sacks of soy bean hay which will be given to feeders of the first of the week. The trip was made by the editor of the Arcadia weekly newspaper, who wrote an article extolling the property and its operation.

WHAT TO DO WITH CREDIT?

Responsible persons in Florida are going to be able to borrow all the money it is wise for them to borrow, regardless of whether there is a surplus of a larger part of the gasoline tax to bond tax.

Most of the talk about establishing and maintaining the credit of the state is so vague and meaningless that it can properly be described as a "big word" game.

Subdivisions of the state will be better off if they are unable to borrow, so they do not need credit. As to responsible individuals and corporations, we go back to the statement that they will be able to borrow all of the money it is wise for them to borrow, regardless of what the legislature does.

TAX MONEY AND VOTES

Persistent arguments are made for turning a larger part of the gasoline tax from the State Road Department to other funds, and if this course is followed, the chance of getting Congress highway money is a state road is increased, for the State Road Department cannot pay out money it hasn't got.

The clamorous claimants for more of the gasoline tax are the school authorities and the owners of over-mortgaged real estate and the holders of mortgages and bonds. Included in the holders of mortgages and bonds are the badly-managed banks.

A good deal of the demand for diversion of gasoline tax money from the State Road Department comes from non-residents, who stand for maintenance of roads from residents of the state.

Senators and representatives in the Florida legislature who pay more attention to the demands of non-resident mortgage holders and non-resident bondholders than to the demands of residents are likely to find that they will be shy of votes if they are candidates for reelection.

A JUDGE'S REB-KE

Hon. George W. Whitehurst, judge of the Fort Myers circuit, in whose court receivers were appointed for the Southern Sugar Company, said in the course of a hearing there on July 2 that his court had taken no judicial cognizance of the proposed reorganization of the Fort Myers circuit. Press says he emphasized the point, and it quotes him in these words: "I have not recommended that any creditor come in under the reorganization plan or that any creditor say he has got something for the individual creditors to determine for themselves."

Judge Whitehurst does want to rebuke those who unauthorized and factious statements would make it appear that he has gone beyond the domain assigned him and has undertaken to be a reorganization manager for the insolvent sugar mill promotion.

The factious statement in a Fort Myers daily paper recently that Judge Whitehurst "should get some public appreciation for his efforts" was clearly inspired by some person who either lacked understanding of a judge's position and responsibilities or who was in an embarrassing situation. It made no sense. The Everglades News to comment on the bad taste

of the Fort Myers newspaper's statement, Judge Whitehurst has added his own rebuke.

Properties are involved in the Southern Sugar Company receivership that are not in the circuit, which Judge Whitehurst presides over. These are mortgages held by other creditors who are not in their jurisdiction. Sellers of property under mortgages have rights given them under the law, rights that were acquired prior to the taking of jurisdiction in receivership, and those rights are superior to the demands of any group of promoters with fantastic plans of high finance.

A SOVIET COMMISSION

A pretty good statement of proper governmental policy was made by Representatives G. O. Lea and A. B. Rowe in the explanation of why they voted against House Bill No. 85-X which was presented at the special session. The bill would set up a Tax Commission and practically abolish local government. About the only thing that Representatives Lea and Rowe did not say that they might have said was that this Commission bill would inaugurate the Soviet Russia system in Florida.

In their statement the representatives said: "We vote 'aye' to indefinitely postpone House Bill No. 85-X because the public is already prejudiced with unnecessary commissions and the measure of the effect and results of bureaucracy is steadily increasing to the detriment of fundamental principles of democratic government. This bill attempts, in the interest of a super-commission over constitutional officers and the members of the public, to deprive the judicial powers, the rights of the people, and the rights of the state of a matter of importance, and creates new jobs for spies, rogues, and liars, and to give the favorite plum-seekers, building up the political machine which feeds the state, the power to increase the burden of taxation. Furthermore experience has demonstrated the ill doing of the relief promised by its advocates, and if the ad valorem tax is reduced the Commission is useless and unnecessary, even in the name of the great god 'Efficiency'."

If local tax officers are incapable, or are not performing their duties, there is a better remedy for the situation than the plan proposed in this bill.

"G. O. LEA."

"A. B. ROWE."

HANSEN TO DENMARK

A Hansen of Pahokee left Sunday for Copenhagen, Denmark, where he has been away from Denmark for nearly 40 years but he hopes to meet relatives and friends. The term in Denmark he will visit is Wabasso.

INSURANCE EXPERT

B. D. Cole, head of an insurance agency in West Palm Beach, who has been in the business for 20 years, is now in the city, assisting Mr. O. Powell in arranging his office for the proposed reorganization. While Mr. Powell is exclusive representative for some companies, he has effected an arrangement with Mr. Cole under which he has access to his expert information on insurance matters.

RECKLESS DRIVERS

Reckless drivers in the South have made a number of arrests for reckless driving and other violations of the traffic laws, particularly on Belle Glade-Pahokee road, where the deaths and injuries were so numerous as to attract wide attention and lead the grand jury to call for better supervision. Persons at Belle Glade have said they were afraid to drive to Pahokee to make deposits at the bank or transact other business because of the recklessness of drivers. A speed limit of 45 miles an hour is permitted but a driver can be reckless at 10 miles an hour. The "one-eyed" lights and lack of tail light is a common form of traffic violation that is bringing arrests.

REPRESENTATIVE BACK

Hon. Edwin A. Bass, a representative of Palm Beach county in the Florida legislature, returned to Pahokee Tuesday. Leaving Tallahassee last week with his wife and baby he stopped on the upper east coast for a brief rest from the fatigue of the session and returned to West Palm Beach and Lake Worth before coming on home. Another 20-day extra session starts next Tuesday. Mr. Bass says the general opinion is that if controversial measures are not entered in the first week of the next extra session, it is likely that nothing will be done, which would mean still another extra session.

SEE \$106 A MEETING

Standard pays its payee, and commissionaires four dollars a meeting, not to exceed \$250 a year, and they are glad of the opportunity to serve for as little as that. That's more than economy; that's love loyalty.—Eugene Herald.

PAHOKEE

ASK ELECTION ON PAHOKEE CHARTER

Petition has been filed with the Palm Beach county court for a special election to determine whether the charter of the town shall take effect.

The petition was brought to the attention of the council at the regular meeting Friday night and was referred to the attorney and clerk with the understanding that Mayor Larriemore will call the election if it is found that an election is required under the act and the petition. The clerk and the attorney are expected to make their report at the regular meeting of the council Friday evening, July 10.

City Clerk, Laing, said he understood the petition calling for an election on the charter was circulated by Chief of Police Harrison, who objects to the provision making the position of chief of police appointive by the council instead of elective in the general election.
